

Marina

© Design by Metrica for Extremis, 2012

This particular design once again shows the 'Tools for Togetherness' philosophy of Extremis. The seemingly endless table is perfect for entertaining large groups of guests, friends and family.

All our designs are original creations and protected by intellectual property rights.

Extremis

The reed green Marina picnic is the preferred table for an outdoor lunch.

Marina

This Marina combo set with matching Captain's Chairs integrates effortlessly into a natural landscape or urban setting.

Extremis

→
Add cushions for
extra soft comfort.

Marina

The fixed benches or Captain's Chairs? At the Marina combo, you always gather gracefully.

The Marina combo table enriches this patio. Notice how there's also a Marina placed indoors, what a fluid transition between outside and inside.

Marina

A table that can be as long as your guest list or as short as you need for a family of four: the Marina is designed for intimate gatherings or large meetings. You

and your guests can easily move about and engage with everyone. This table is the ultimate conversation playground.

Materials	Key facts	Thickness mm	Layer thickness micron	Density	In/outdoor	Water	UV color fastness	Flame retarding
Coated fiberglass tabletop & benches	- Made with pultrusion technique: a non-stop process of fibre glass wires pulled through a bath of polyester - Strong - Lightweight	2,7	n.a.	1,80 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	/
Structured powder coated zinc steel legs	- Easy to clean - Electro galvanized (for extra protection against rust), then powder coated - More scratch-resistant than non structured powder coating	3	100	7,50 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	NEN-EN13501-1 A1 *
Polyamide feet	- Injection-moulded nylon - Adjustable in height and surface	n.a.	n.a.	1,14 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good	/
Sunbrella® cushions	100% Sunbrella Acrylic - Best outdoor fabric available for making cushions - Dirt repellent - Not waterproof, store inside! - Machine washable at max. 30°C. - Ironing restores the protective layer	0,50	n.a.	260 g/m ²	Outdoor & indoor	The fabric has a water column of 350 mm (EN 20811)	7/8 (ISO 105-B02)	/

NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Good to know

- 55 cm bench space / person - 70 cm chair space / person.
- The average transport volume is 0,17m³ / person, which is really low.
- Fiberglass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of pulling fiberglass wires through a bath of polyester resin and letting them harden in a matrix afterwards to get their final shape.
- Main advantages of this material are its strength and low weight.

- Marina combo comes perfectly with Captain's Chairs.

Maintenance

www.extremis.com/maintenance

POWDER COATED PARTS

- White powder coating obviously requires more maintenance.

SUNBRELLA

- Shake or brush off loose dirt immediately.
- Spray Extremis Multi Cleaner.
- Use a soft brush and make circular movements.
- Let the suds soak in for a moment.
- Rinse thoroughly to remove all soap residue.
- Simply allow to dry.
- It's also possible to put the blanket and the pillow covers in a washing machine (max 40°C). Follow the cleaning instruction on the label.
- If the cushion has metal brackets, we recommend turning the cover inside out first to avoid damaging the washing machine. In this case, leave the zipper open about 10 cm.

F.A.Q.

Q: What is the biggest size possible?

A: We have produced a 30m table, the only problem is transport. We can deliver tables up to 6m without extra costs.

Q: Are the legs corrosion-resistant?

A: The legs are first galvanized, and powder-coated afterwards. This way, we have a double protection layer.

Q: Can we make different combinations?

A: The combinations on the previous pages are only suggestions. The only limit is your own imagination.

Floor fastening

Marina combo comes with an optional floor fastening set. Find more instructions in the manual.

Warnings ⚠

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colors can differ over years and from batch to batch.

Product

- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.

- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- We strongly advise you against standing on top of the table! A concentrated load can cause small perceptible cracks in the profiles that might be visually annoying, although they do not affect the strength of the table in any way.
- For table with 3 legs or more, we recommend using trestles to attach the table leg assemblies to the tabletop, instead of keeping it upside down.

Coated fiberglass

- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Dark colors can get very hot in sunny weather.

Powder coating

- White powder coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-sl - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.
- Dark colors can get very hot in sunny weather.

Sunbrella

- Not waterproof, store inside!
- Shake or brush off loose dirt immediately.
- UV color fastness: 7/8 (ISO 105-B02).

Materials	Key facts	Thickness mm	Layer thickness micron	Density	In/outdoor	Water	UV color fastness	Flame retarding
Coated fiberglass tabletop & benches	- Made with pultrusion technique: a non-stop process of fibre glass wires pulled through a bath of polyester - Strong - Lightweight	2,7	n.a.	1,80 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	/
Structured powder coated zinc steel legs	- Easy to clean - Electro galvanized (for extra protection against rust), then powder coated - More scratch-resistant than non structured powder coating	3	100	7,50 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	NEN-EN13501-1 A1 *
Polyamide feet	- Injection-moulded nylon - Adjustable in height and surface	n.a.	n.a.	1,14 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good	/
Sunbrella® cushions	100% Sunbrella Acrylic - Best outdoor fabric available for making cushions - Dirt repellent - Not waterproof, store inside! - Machine washable at max. 30°C. - Ironing restores the protective layer	0,50	n.a.	260 g/m ²	Outdoor & indoor	The fabric has a water column of 350 mm (EN 20811)	7/8 (ISO 105-B02)	/

NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Good to know

- 55 cm bench space / person.
- The average transport volume is 0,17m³ / person, which is really low.
- Fiberglass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of pulling fiberglass wires through a bath of polyester resin and letting them harden in a matrix afterwards to get their final shape.
- Main advantages of this material are its strength and low weight.

Floor fastening

Marina picnic comes with an optional floor fastening set. Find more instructions in the manual.

Maintenance

www.extremis.com/maintenance

POWDER COATED PARTS

- White powder coating obviously requires more maintenance.

SUNBRELLA

- Shake or brush off loose dirt immediately.
- Spray Extremis Multi Cleaner.
- Use a soft brush and make circular movements.
- Let the suds soak in for a moment.
- Rinse thoroughly to remove all soap residue.
- Simply allow to dry.
- It's also possible to put the blanket and the pillow covers in a washing machine (max 40°C). Follow the cleaning instruction on the label.
- If the cushion has metal brackets, we recommend turning the cover inside out first to avoid damaging the washing machine. In this case, leave the zipper open about 10 cm.

F.A.Q.

Q: What is the biggest size possible?

A: We have produced a 30m table, the only problem is transport. We can deliver tables up to 6m without extra costs.

Q: Are the legs corrosion-resistant?

A: The legs are first galvanized, and powder-coated afterwards. This way, we have a double protection layer.

Warnings ⚠

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colors can differ over years and from batch to batch.

Product

- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.

- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- We strongly advise you against standing on top of the table! A concentrated load can cause small perceptible cracks in the profiles that might be visually annoying, although they do not affect the strength of the table in any way.
- For table with 3 legs or more, we recommend using trestles to attach the table leg assemblies to the tabletop, instead of keeping it upside down.

Coated fiberglass

- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Dark colors can get very hot in sunny weather.

Powder coating

- White powder coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-s1 - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.
- Dark colors can get very hot in sunny weather.

Sunbrella

- Not waterproof, store inside!
- Shake or brush off loose dirt immediately.
- UV color fastness: 7/8 (ISO 105-B02).

Wheelchair accessibility dimensions

As specifications for wheelchair accessibility vary around the world, please review the dimensions below to ensure the measurements of each solution meet the specifications of your local requirements

The Marina table with two legs is wheelchair accessible

Dimensions (mm)	L	l1
Marina table 195	1950	1400
Marina table 265	2650	2100
Marina table 335	3350	2800
Marina table 405	4050	3500

The Marina table with three legs is wheelchair accessible

Dimensions (mm)	L	l1	l2
Marina table 475	4750	2100	2100
Marina table 545	5450	2800	2100
Marina table 615	6150	2800	2800
Marina table 685	6850	3500	2800

Marina table + Captain's Chairs

How many people can sit on a Marina table?

2 legs	195 cm 4 Chairs		
	265 cm 6 Chairs		
	335 cm 8 Chairs		
	405 cm 10 Chairs		
3 legs	475 cm 12 Chairs		
	545 cm 14 Chairs		The position of the legs is assymetrical
	615 cm 16 Chairs		
	685 cm 18 Chairs		The position of the legs is assymetrical

Tabletop, legs & endcaps

Off white (RAL9002)
Structured powder coating

Verdigris
Structured powder coating

Reed green (RAL6013)
Structured powder coating

Copper brown (RAL8004)
Structured powder coating

Materials	Key facts	Thickness mm	Layer thickness micron	Density	In/outdoor	Water	UV color fastness	Flame retarding
Coated fiberglass tabletop	- Made with pultrusion technique: a non-stop process of fibre glass wires pulled through a bath of polyester - Strong - Lightweight	2,7	n.a.	1,80 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	/
Structured powder coated zinc steel legs	- Easy to clean - Electro galvanized (for extra protection against rust), then powder coated - More scratch-resistant than non structured powder coating	3	100	7,50 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	NEN-EN13501-1 A1 *
Polyamide feet	- Injection-moulded nylon - Adjustable in height and surface	n.a.	n.a.	1,14 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good	/

NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Good to know

- 70 cm chair space / person.
- The average transport volume is 0,17m³ / person, which is really low.
- Fiberglass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of pulling fiberglass wires through a bath of polyester resin and letting them harden in a matrix afterwards to get their final shape.
- Main advantages of this material are its strength and low weight.

- Marina table comes perfectly with Captain's Chairs.

Maintenance

www.extremis.com/maintenance

POWDER COATED PARTS

- White powder coating obviously requires more maintenance.

F.A.Q.

Q: What is the biggest size possible?

A: We have produced a 30m table, the only problem is transport. We can deliver tables up to 6m without extra costs.

Q: Are the legs corrosion-resistant?

A: The legs are first galvanized, and powder-coated afterwards. This way, we have a double protection layer.

Floor fastening

Marina table comes with an optional floor fastening set. Find more instructions in the manual.

Warnings ⚠

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colors can differ over years and from batch to batch.

Product

- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.

- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- We strongly advise you against standing on top of the table! A concentrated load can cause small perceptible cracks in the profiles that might be visually annoying, although they do not affect the strength of the table in any way.
- For table with 3 legs or more, we recommend using trestles to attach the table leg assemblies to the tabletop, instead of keeping it upside down.

Coated fiberglass

- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Dark colors can get very hot in sunny weather.

Powder coating

- White powder coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-sl - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.
- Dark colors can get very hot in sunny weather.

Structured powder coating

Reed green (RAL6013)
Structured powder coating

Copper brown (RAL8004)
Structured powder coating

Materials	Key facts	Thickness	Layer thickness	Density	In/outdoor	Water	UV color fastness	Flame retarding
		mm	micron					
Coated fiberglass tabletop	- Made with pultrusion technique: a non-stop process of fibre glass wires pulled through a bath of polyester - Strong - Lightweight	2,7	n.a.	1,80 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	/
Structured powder coated zinc steel legs	- Easy to clean - Electro galvanized (for extra protection against rust), then powder coated - More scratch-resistant than non structured powder coating	3	100	7,50 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good: color can fade to some extent when exposed to UV	NEN-EN13501-1 A1 *
Polyamide feet	- Injection-moulded nylon - Adjustable in height and surface	n.a.	n.a.	1,14 10 ³ kg/m ³	Outdoor & indoor	n.a.	Very good	/

NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Good to know

- 70 cm chair space / person.
- The average transport volume is 0,17m³ / person, which is really low.
- Fiberglass reinforced polyester resin material is made with the so-called pultrusion technique. Pultrusion is a non-stop process of pulling fiberglass wires through a bath of polyester resin and letting them harden in a matrix afterwards to get their final shape.
- Main advantages of this material are its strength and low weight.

- Marina high table comes perfectly with Captain's Chairs & Tiki bar stools.

Maintenance

www.extremis.com/maintenance

POWDER COATED PARTS

- White powder coating obviously requires more maintenance.

F.A.Q.

Q: What is the biggest size possible?

A: We have produced a 30m table, the only problem is transport. We can deliver tables up to 6m without extra costs.

Q: Are the legs corrosion-resistant?

A: The legs are first galvanized, and powder-coated afterwards. This way, we have a double protection layer.

Floor fastening

Marina table comes with an optional floor fastening set. Find more instructions in the manual.

Warnings ⚠

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colors can differ over years and from batch to batch.

Product

- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.

- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- We strongly advise you against standing on top of the table! A concentrated load can cause small perceptible cracks in the profiles that might be visually annoying, although they do not affect the strength of the table in any way.
- For table with 3 legs or more, we recommend using trestles to attach the table leg assemblies to the tabletop, instead of keeping it upside down.

Coated fiberglass

- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Dark colors can get very hot in sunny weather.

Powder coating

- White powder coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Color can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-s1 - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.
- Dark colors can get very hot in sunny weather.
